

# AIR SHOW AND EQUIPMENT RENTAL SERVICES

## Air show services

With a background of more than 18 years in the manufacture and supply of ground power systems for the aviation industry worldwide, Powervamp Ltd has steadily developed its airshow and ground power rental business to become one of the most widely recognised suppliers of this specialised support service. The company is ISO9001:2002 accredited.

Powervamp has a large inventory of 400Hz AC and DC converters, power supplies, cabling and junction boxes which it rents to the organisers and exhibitors at major airshows such as Farnborough, Paris, Dubai and Singapore. Its team of engineers are experienced in all aspects of pre-show planning and electrical installation.

In the early 1990s, Powervamp pioneered the concept of using remote generator power at airshows to operate its unique 28 volt DC electrical TRU units within the static display area. This removed the problems of GPU noise and exhaust pollution, and proved a breakthrough for aircraft exhibitors. The concept swiftly developed into the present practice of using all-electric power for 115V AC 400Hz and DC powered aircraft at static displays.
